

Water Feature

Code: ANCMF-AU-GB-WF-01 • Facility: Government Building • Frequency: daily

Scope of Work

- Remove debris and rubbish from the water feature.
- Clean and sanitise surrounding surfaces and edges.
- Wipe down any accessible decorative elements.
- Ensure water clarity by removing visible contaminants.
- Dust and wipe surrounding areas to prevent dirt accumulation.

Method

1. Use a net to remove floating debris and rubbish from the water surface.
2. Apply a suitable cleaning solution to a cloth and wipe down the edges and surfaces surrounding the water feature.
3. Use a soft cloth to gently clean decorative elements, ensuring no damage occurs.
4. Inspect the water for clarity and remove any visible contaminants using appropriate tools.
5. Dust and wipe surrounding areas with a microfibre cloth to prevent dirt accumulation.

Equipment

- Net for debris removal
- Microfibre cloths
- Cleaning solution suitable for water features
- Soft cloth for delicate surfaces
- Rubbish bin for debris disposal

Quality Criteria

Performance Level	Criteria
Excellent	Water is crystal clear with no visible debris; all surfaces are spotless and dry; no odours present; decorative elements are pristine.
Good	Water is clear with minimal debris; surfaces are clean with slight moisture; no unpleasant odours; decorative elements are clean.
Pass	Water has some cloudiness; surfaces have minor smudges; faint odours may be present; decorative elements have minor dust.
Fail	Water is murky with visible debris; surfaces are dirty or wet; strong odours present; decorative elements are dusty or dirty.
