

Aircraft Wash

Code: ANCMF-AU-TH-AW-01 • Facility: Transportation Hub • Frequency: daily

Scope of Work

- Thorough cleaning of aircraft exterior surfaces including fuselage, wings, and tail.
- Sanitising of all touchpoints such as door handles and service panels.
- Removal of dirt, grime, and contaminants from aircraft surfaces.
- Application of appropriate cleaning agents to prevent corrosion and maintain surface integrity.
- Use of colour-coded cleaning systems to prevent cross-contamination.
- Proper disposal of cleaning waste in designated rubbish bins.

Method

1. Inspect the aircraft for any visible dirt or contaminants.
2. Prepare cleaning solutions according to manufacturer instructions and safety data sheets.
3. Apply cleaning solution using appropriate equipment, ensuring even coverage.
4. Rinse thoroughly with water to remove all cleaning agents and residues.
5. Dry surfaces using clean, lint-free cloths or air drying methods.
6. Conduct a final inspection to ensure all areas meet cleanliness standards.

Equipment

- High-pressure water hoses
- Microfibre cloths
- Environmentally friendly cleaning agents
- Cleaning trolleys with colour-coded buckets
- Non-abrasive cleaning pads
- Personal protective equipment (PPE)

Quality Criteria

Performance Level	Criteria
Excellent	No visible dirt or streaks; all surfaces are dry and free of residues; touchpoints are sanitised; no odours present.
Good	Minor streaks or water spots; surfaces mostly dry; touchpoints sanitised; no strong odours.
Pass	Some visible dirt or streaks; surfaces may be damp; touchpoints mostly sanitised; slight odours may be present.
Fail	Visible dirt, streaks, or residues; surfaces wet; touchpoints not sanitised; strong odours present.
